

Charioteer Wheelchair Moped & Motorcycle

Charioteer strikes the right balance between comfort and safety.

Provides riders

a thrilling and enjoyable experience. Extend the capability and range of your power chair, or

wheelchair to enhance your lifestyle by choosing when and where you'll travel.

The Charioteer offers an increased level of personal freedom, and is the only affordable, limited mobility

product on the market today.

Available in two models: Charioteer Wheelchair Motorcycle that can reach speeds of up to 47 mph, or the Charioteer Wheelchair Moped that can have you cruising at 30 mph.

Twin engines just, like an airplane, mean safety and redundancy. This is very unique and important for a mobility impaired person who can't simply get off and walk. Can be Licensed as a Moped in most states - means many who could not drive with a full driver's license may still be able to experience the independence of transportation, driving themselves safely and legally!
